

# Covid19 Info

September 2022

## Basic measures to keep in mind

- Ventilation is necessary based on the CO<sup>2</sup> measurements done in every common room. When the level of 800 ppm is exceeded you need to open a door and a window.
- Masks are not obliged, but allowed. They are recommended for vulnerable staff/students.
- When you are infected with Covid, you stay home in isolation for 7 days. After those 7 days you can return to school wearing a mask for 3 days or avoid close contact with other staff members or students.
- Basic hand hygiene is recommended.
- In situ lessons are organised as much as possible. When necessary to maintain the quality of education, online classes/hybrid teaching can be organised if possible.
